

Estimate Settings

Configure estimate defaults including hourly rate, tax rates, discounts, rounding options, customer accepted options, and expiry settings.

Estimate Settings in PaintScout control defaults for hourly rates, taxes, discounts, rounding, and expiry that apply to all new estimates.

 Changes to estimate settings only affect **future** estimates, not existing or draft estimates.

Watch on

What is the Hourly Rate setting?

The hourly rate is what you charge the customer per hour. Set a default value here, and enable the checkbox to allow your team to customize the hourly rate on individual estimates.

Hourly Rate

The rate you charge your customer per hour.

HOURLY RATE, \$ *

How do Tax Rates work?

Tax rates with **Include on New Estimates** enabled are automatically applied to every new estimate. Rates without this option remain available in the sidebar menu for manual selection.

To add a rate, click **+Add Tax Rate**. To remove one, click the circle icon on the right.

Tax Rates

Add your list of tax rates and select one or more as a default to appear on new estimates made.

TAX DESCRIPTION	TAX RATE (%)		
GST	5	☒ Include on New Estimates	
HST	3	☒ Include on New Estimates	
PST	7	☐ Include on New Estimates	

+ ADD TAX RATE

 You can also use tax rates to add other percentage charges like credit card fees or disposal fees.

How do Discounts work?

Discounts can be a percentage (%) or dollar amount (\$). All discounts are available for selection from the estimate sidebar menu.

- Check **Include on New Estimates** to auto-apply a discount to all new estimates.
- Click the circle icon on the right to delete a discount.

Discounts

Add your list of discount rates. You can select one as a default to appear on new estimates made.

What are the Rounding options?

Hours

Choose a rounding increment for painting hours: 1 hour, 0.5 hours (30 min), 0.25 hours (15 min), or no rounding for precise numbers.

Hours

Adjust how hours are rounded on your estimates.

- ☐ 0.5 hours
- ☐ Don't round hours
- ☒ 0.25 hours
- ☐ 1 hour

Product & Materials

Products and Materials ?

Adjust how products are rounded. This rounding is only applied to the final products calculated on the work order to avoid compound rounding errors.

- ☐ No rounding
- ☒ Round to nearest unit
- ☐ Always round upwards

- **Round to nearest unit:** to the nearest integer. Ex: 2.2 gal would round to 2 gal.
- **Always round upwards:** to the highest integer. Ex: 2.2 gal would round to 3 gal.

[Learn more about product rounding and how it works!](#)

Price Rounding

Set price rounding for surfaces, line items, and totals. Options: No rounding, Round to nearest dollar, or Always round upwards.

Price

Adjust how the price of areas and line items are rounded on your estimates.

- ☒ No rounding
 - ☐ Round to nearest dollar
 - ☐ Always round upwards
-

What are Customer Accepted Options?

Enable this setting to let customers add their own options to the estimate before accepting it.

Customer Accepted Options

Changes made to this setting **will** affect existing estimates.

☒ Allow customers the ability to add and remove options from their estimate.

What is Client Visible Expiry?

Client Visible Expiry automatically expires estimates after a set number of days. Expired estimates display a screen prompting the customer to contact their estimator.

The expiry date shows as TBD until the estimate is **sent**.

Client Visible Expiry

Estimates expire, becoming un-viewable by clients after a chosen time.

Update Your Tax Rate

Configure tax rates in estimate settings with options to automatically include rates on new estimates or add multiple tax rates.

Tax rates in PaintScout control the sales tax applied to your estimates. You can set default rates that auto-apply to new estimates or add multiple rates for different jurisdictions.

How to Update Your Tax Rate

1. Navigate to the person icon and select **Account Settings > Estimates > Settings**.

2. Scroll to the tax rates section and enter your tax rates. Enable the **Include on New Estimates** toggle to auto-apply this rate to every new estimate. Rates without this toggle enabled remain available in the sidebar menu for manual selection.

i If you do not apply tax, simply leave these fields blank and unchecked.

Tax Rates

Add your list of tax rates and select one or more as a default to appear on new estimates made.

TAX DESCRIPTION	TAX RATE (%)		
GST	5	☒ Include on New Estimates	—
HST	3	☒ Include on New Estimates	—
PST	7	☐ Include on New Estimates	—

[+ ADD TAX RATE](#)

How to Add More Tax Rates

1. Click the **Add Tax Rate** button and fill in the fields.

Tax Rates

Add your list of tax rates and select one or more as a default to appear on new estimates made.
