

Share With Your Team

Share estimates and work orders with your team via email, live links, or downloadable PDFs for seamless collaboration.

PaintScout provides three ways to share estimates and work orders with your team: email, live links, and downloadable PDFs. Different [user types and permissions](#) determine what each team member can access.

Sharing (Sales/Team)

As a Sales or Team user with sharing permissions, you can share estimates and work orders using any of the three methods below. You also have access to the **Share with Staff** action to make estimates visible to specific Painter users.

1. [Send as an Email](#)
2. [Share as a Live Link](#)
3. [Download a PDF](#)

Receiving (Painter)

Painter users can receive estimates, invoices, and work orders as shared links from Sales or Team users.

To set up notifications:

1. Go to **Your Profile** → **Notifications**.
2. Enable the relevant sharing notifications.

What to expect from shared links:

- Open the shared document directly from the link.
- View the full document content included in that link.
- Use the link outside the Painter app experience.

Shared links are separate from Painter permissions inside the app.

1. Send as an Email

- Open the estimate or work order you want to share.
- If you are wanting to share the Estimate please ensure you are on the **Estimate** tab.
- If you are wanting to share the Work Order, please ensure you are on the **Work Order** tab. Once you're ready, click on the **Send** button.
- In the **To:** field, enter your client or team member's email address and customize the email template as needed. When you are ready, press send and your estimate or work order will be on its way to their inbox!

The screenshot displays the PaintScout web application interface. At the top, a navigation bar includes the 'FRESH Painting' logo and tabs for 'DASHBOARD', 'ESTIMATES', 'INVOICES', 'REPORTS', and 'PEOPLE'. The 'ESTIMATES' tab is active. Below the navigation bar, the page title is 'Exterior Home' with a status of 'Accepted' and 'Exterior Estimate'. A 'SEND' button is visible, along with a note 'Last saved 13 minutes ago'. The main content area shows the estimate details for 'Fresh Painting' at '123 Sesame Street SW, Somewhere, PL 654321, 111.123.8900'. The contact information for 'Staci Mitchell' is listed: '4844 Jewell Road, Savannah, GA, staci@paintscout.com'. The estimate ID is '2009' and the date is '04/06/2023'. The estimate is titled 'Estimate' and includes a table with the following items:

Item	\$
Exterior Preparation	
• Power wash all exterior surfaces	
• Scrape and sand to remove loose or peeling paint	
• Any cracks or holes will be caulked as needed (wood trim)	
• Spot prime bare surfaces as needed	

2. Share as a Live Link

Sometimes, real-time collaboration is key. With PaintScout, you can share estimates or work orders as live links, allowing your team to stay up to date with the latest updates as they occur.

- Click on the drop-down menu next to the **Send** button and choose either **Copy Estimate Link** or **Copy Work Order Link**.
- Once you've done that, you can paste the link in an email, text message, or Slack channel message to share it with your team.
- They can simply click on the link to access the estimate, and any changes you make will be visible to them in real-time.

The screenshot displays the PaintScout web application interface. At the top, a navigation bar contains links for DASHBOARD, ESTIMATES, INVOICES, REPORTS, and PEOPLE. The main section is titled 'Exterior Home' and shows an 'Accepted' status. It includes a 'SEND' button with a dropdown menu. Below this, there's a section for 'Estimate' with a table containing 'ESTIMATE ID' (2009) and 'DATE' (04/06/2023). A list of items is shown under 'Exterior Preparation', including 'Power wash all exterior surfaces', 'Scrape and sand to remove loose or peeling paint', 'Any cracks or holes will be caulked as needed (wood trim)', and 'Spot prime bare surfaces as needed'.

3. Download a PDF

If you prefer a more traditional approach, PaintScout lets you download estimates or work orders as PDF documents.

- Click on the drop-down menu next to the **Send** button and select **Download PDF** for the estimate *or* work order.
- Once you have the PDF file, you can email it directly to your team or print it out for their reference.
