

Add & Edit Line Items

Add and customize line items on estimates including pricing options, materials, hours, photos, and notes for detailed project scopes.

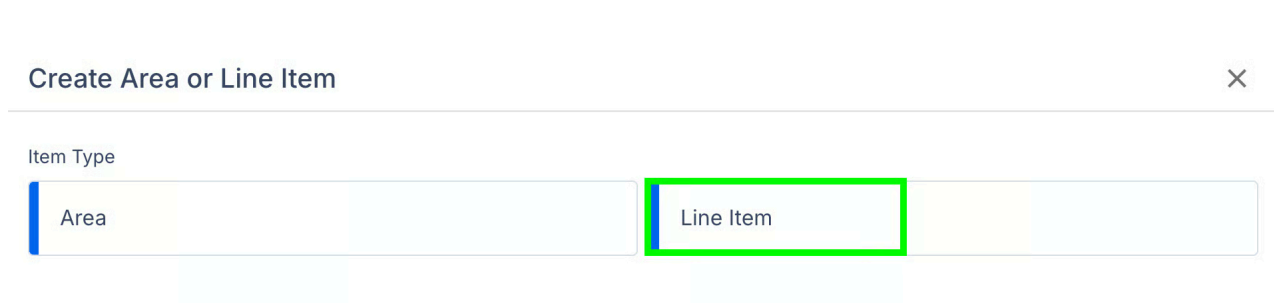

A line item in PaintScout is a fixed-price entry for work that does not use dimension-based production rates, such as furniture moving, power washing, or specialty finishes.

How do you add a line item to an estimate?

1. Click on the **Add Area or Line Item** button.

2. Choose **Line Item**.

3. Select a saved line items from your **Account Settings**, or create a custom line item.

What can you customize on a line item?

- **Name and description** for the customer-facing estimate.
- **Pricing** via hourly rate, quantity, or custom options — or no price at all.
- **Materials, hours, photos, and notes** for detailed scoping.
- **Visibility** — hide informational-only items from the work order to keep it tidy.

Save a custom line item to account settings

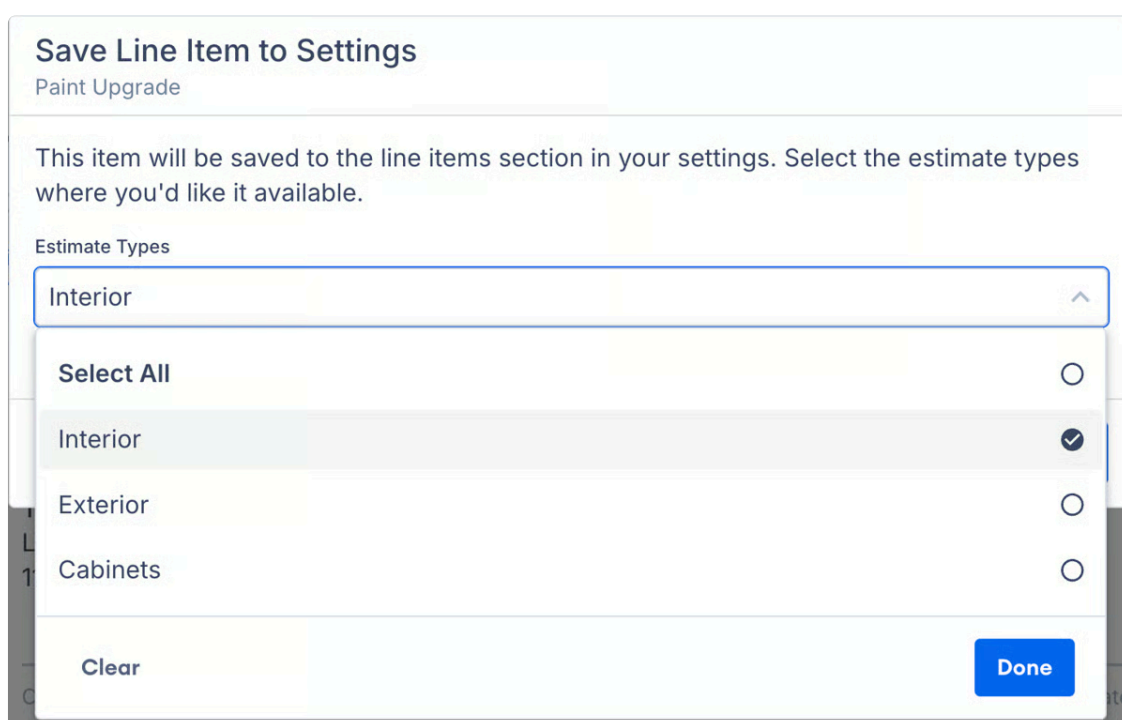

When creating a custom line item, choose the option to save it to your settings. The line item then becomes available for future estimates.

i Saving a custom line item makes it reusable. Changes to the line item on the current estimate remain specific to that estimate.

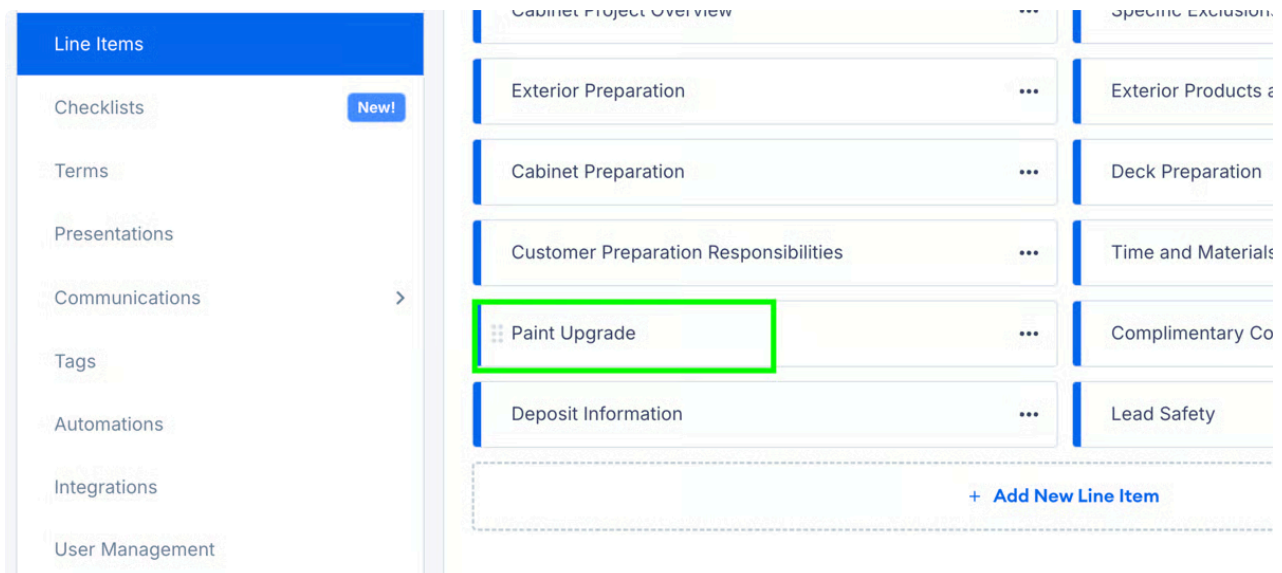

1. Click the three dots next to the line item.
2. Select **Save to settings**.

3. You will be prompted to select the **Estimate Type(s)** the line item will belong to. [Learn about Estimate Types.](#)

4. The saved line item can be found in your **Account Settings** → **Line Items**. This line item can now be applied to future estimates.
