

# Estimate Templates

Create reusable estimate templates with pre-filled areas, rates, and line items to speed up creating similar estimates.

Estimate Templates in PaintScout are pre-filled estimates with areas, rates, and line items already configured, so you can create similar estimates faster without starting from scratch.

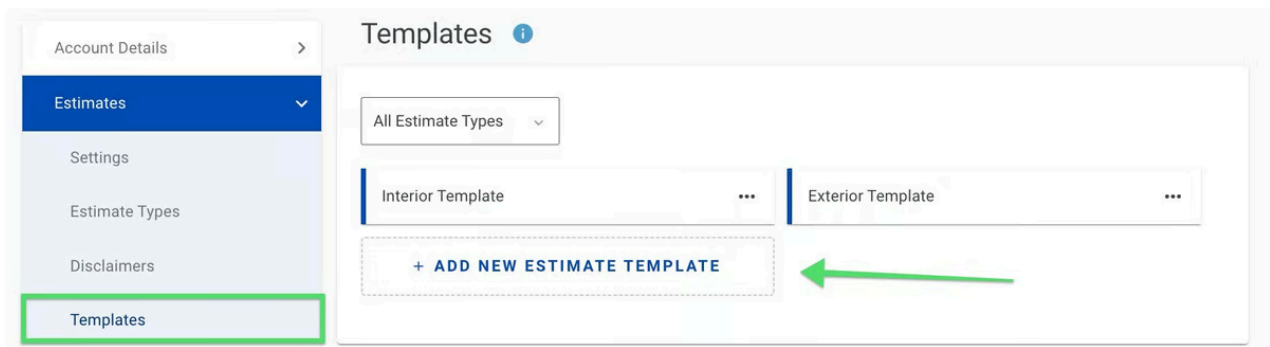

## Why use Estimate Templates?

Templates save time when you frequently create similar estimates. Pull up a saved template and adjust it instead of building each estimate from scratch.

## How do I create an Estimate Template?

1. Go to your **Account Settings > Estimates > Templates** section. Click **+Add New Estimate Template**.

2. Enter the name of your template, and select which estimate type it is associated with.

## Create New Estimate Template

| Total                                                                                                                                                                                                                                                                                                                                                                                                             | \$601.25            |

## What are Smart Templates?

All new templates use **Smart Template** functionality, which automatically incorporates your latest production rates and settings to ensure consistency. Older customized templates display a banner at the top.

Everything on this template is fully customizable but will **not** automatically update with the latest production rates, products, or hourly rate from your settings. To work with the latest version of information from your settings and selected estimate type, we recommend creating a new estimate template, which will utilize our [Smart Template](#) functionality.

**Customized templates cannot be converted into Smart Templates.** To utilize the Smart Template functionality, you must recreate the template manually.

## How do I create a template from an existing estimate?

You can save any existing estimate as a template without creating it from Settings.

1. Click the drop-down arrow beside the send button and select **Save as Template**.

The screenshot shows the 'Interior Estimate' page in the PaintScout interface. At the top, there's a navigation bar with a back arrow and 'BACK TO ESTIMATES'. Below that, the title 'Interior Estimate' is displayed with a green 'Accepted' status indicator. A 'SEND...' button with a dropdown arrow is visible, and a 'SAVE' button is also present. A dropdown menu is open from the 'SEND...' button, showing several options: 'Preview/Accept', 'Share with Staff', 'View Invoice', 'Save as Template' (highlighted with a green border), 'Copy Estimate Link', 'Copy Work Order Link', 'Download Estimate', 'Download Work Order', 'Copy Estimate', 'Archive Estimate', and 'Delete Estimate'. The main content area shows contact information for PaintScout and Jane McKinley, job address details for Olivia Sparks, and a table with estimate details including ID, date, and expiration. The 'Estimate' section is partially visible at the bottom.

2. Add a name for the template and choose the estimate type you want it assigned to. Click **Confirm** to save the estimate as a template. You can then adjust the template by editing it in your settings.
