

Line Items Overview

Create reusable line items for fixed-price services, quantities, and custom charges.

What is a line item?

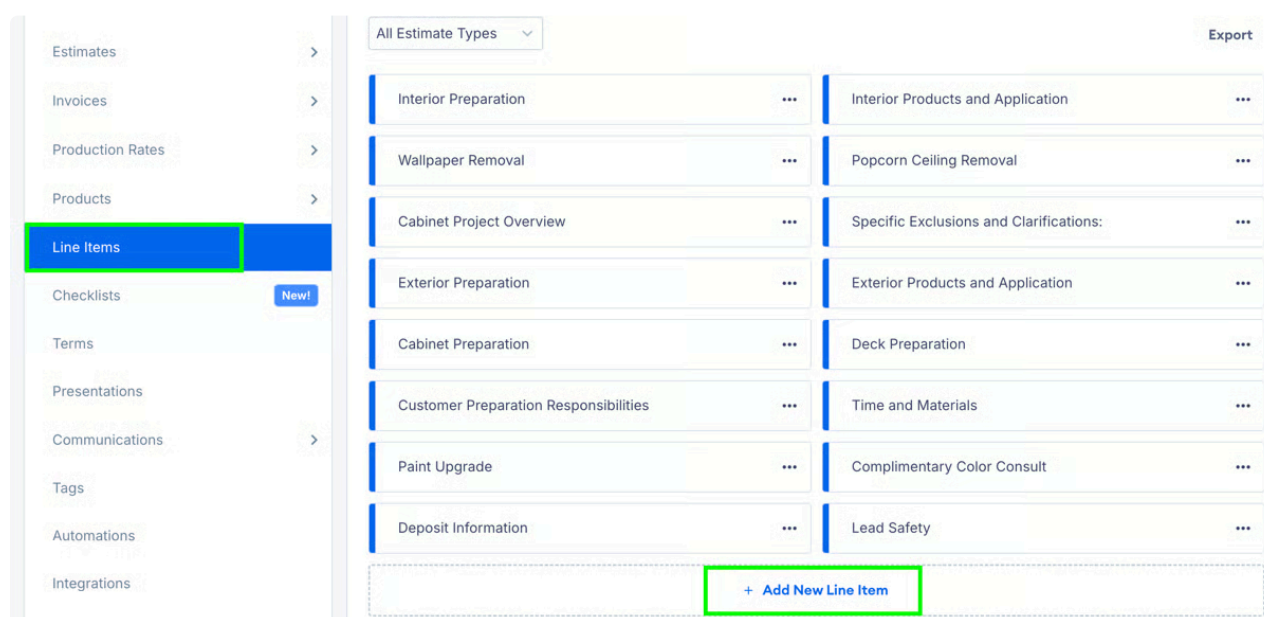

A line item is a fixed-price project entry. It does not use dimensions or production rates.

Use line items for services, quantities, or custom charges. Save common items in **Account Settings** for reuse.

You can also save a custom item from an estimate. See [Add & Edit Line Items](#).

Create a line item

1. Select the person icon.
2. Go to **Account Settings** → **Line Items**.
3. Select **+ Add New Line Item**.
4. Enter a label and description.

How do I set my line item pricing?

There are three ways to set your line item pricing in your settings:

- [Hourly Rate](#)
- [Quantity](#)
- [Custom](#)

Hourly rate

Enter the hours you apply to this item. PaintScout uses the hourly rate on the current estimate.

CALCULATE PRICE BY

☒ Hourly Rate ☐ Quantity ☐ Custom

 Price will be calculated using the Hourly Rate **on the current estimate.**

HOURS

8

HOURLY RATE (\$/HR)

70.00

PRICE (\$)

0.00

Quantity

Enter the units and price per unit for this line item. PaintScout calculates the total.

Select **+ Hrs For Work Order** to add hours without changing the price.

Price (\$)

100.00

+ Hrs for Work Order

Can I add notes and materials?

Select **Notes** to add default notes. You can edit them on each estimate.

- **Crew note** appears on the team work order.
- **Client note** appears on the customer estimate.

Manage line items

Reorder line items

When selecting line items on an estimate, the order follows the order from your settings. We recommend putting frequently used line items at the top of your list.

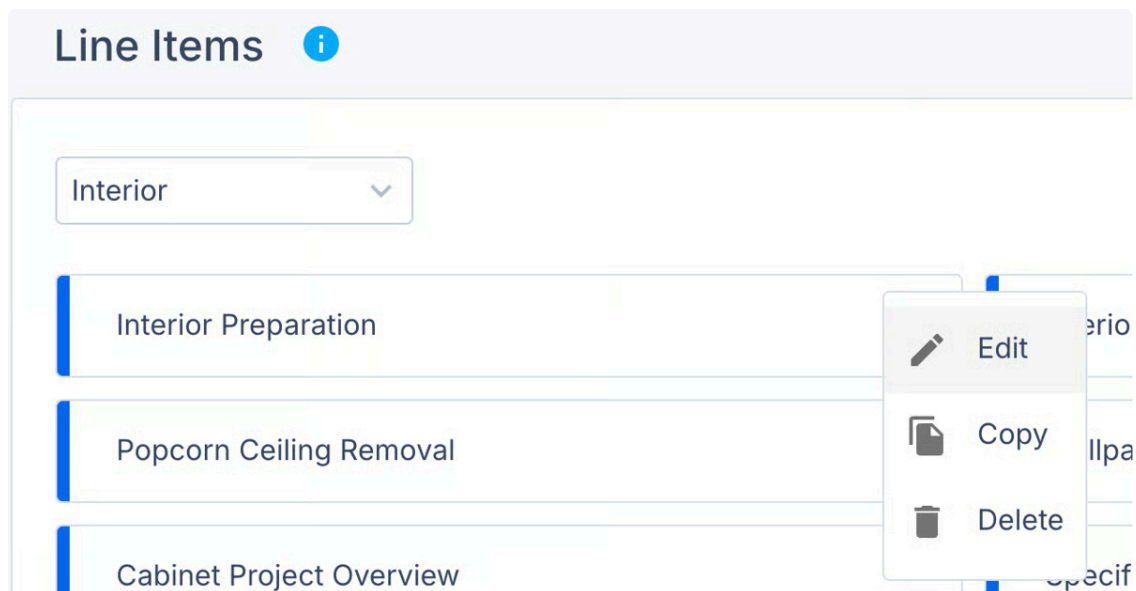

Drag an item to its new position, then select **Save Changes**.

Edit, Copy and Delete

Click the three dots next to a line item.

You can then choose to edit, copy or delete that item.
